Thanks, we wouldn't pay for the dam in the RA anyway because it does not remediate the site

No the Lake Conestee Foundation wanted to pursue the NPL route to see if they could receive funding for the dam restoration but this site is complex/attribution issues and the shallow sediments numbers are not high enough to list.

No – Ken Taylor wants to know if we have heard anything about funding for the dam at lake Conestee?

Hey Meredith,
I think you meant to forward this to Glenn or Rosemarie maybe?

It's more about the dam – see email

Yes will send draft to Sandra by COB, the site will be NFRAPd for federal CERCLA work. The recommendations mention that the foundation should pursue dam reinforcement.

Thanks. Now that Mrs. Martin is back, she can send it to SCDHEC. ☺

Subject: R4 - Reassessment Screening Template

Hi Meredith,

Attached is the reassessment template. Please review and provide feedback. We used the Narrative summary template and a previous reassessment template that was prepared under the START contract.

After getting the green light from you, we will pass on to the states, as a quick template for OCA or NFRAP sites that are on backlog lists. This should enable us to get credit for these activities.

Thanks
